'Flashback' is re-experiencing something, a memory that returns to our consciousness. Flashbacks are fragments of our biography; they help us reconstruct the past.

In film, flashbacks are used to show the past.

We will concentrate on the perception of particular contents that are or have been important to us, things that moved us and made us think. Because we cannot totally exclude reality, but have to select excerpts instead, it is important that we develop a kind of 'Flashback' culture so that areas of concentration do not more or less occur, but are specially adapted to our personal make-up, prospects and wishes.

At this Academy we want to examine how we can achieve this using various creative disciplines and with different creative and technical means.

The following workshops are planned: Drawing & Painting (Malgorzata Bielecka, Kielce/Pl), Video Film 1 (Ingo Mertins, Scheersberg), Video Film 2 (Fabio Magnifico, Bielefeld), Camera Obscura Photography (Aleksandra Janik, Opole/Pl), Audio Plays (Paul John, Bielefeld), Paper and Books (Andreas Wendt, Roland Meinel, Leipzig)
